

How Does Your Lottery Management System Stack Up to the Industry Leader?

School organizations today require end-to-end automation from gathering applications to validating data and applying preferences to running successful school lotteries to making offers. The demand for a modern solution is now – accessible, efficient, and transparent systems are necessary to meet increasing lottery complexities and to keep families in the loop every step of the way.

Use this checklist to evaluate your current process.

Features that Go Above & Beyond

- Automated
- Transparent
- Compliant
- Workflows
